iVcardo
Global Ground Dispatch Channel

An innovative global ground dispatch channel connecting retailers of transport services with transport operators, eliminating operational inefficiencies, friction and cost.

iVcardo is a B2B MaaS solution where demand for ground transportation is connected with quality-assured operators.

Our uniqueness and independence as an agnostic technology provider allows retail and transport operators to work openly together in a transparent environment.

Our platform improves market liquidity by facilitating the seamless booking, exchange, fulfilment and billing of transport services on a global scale eliminating the need for costly legacy system integrations.

Platform USP's

1 Single API provides unrestricted access to transport operators globally, independent of size, location or technology environment

2 Simple driver onboarding process, providing global multi-lingual ride tracking via our unique RideBridge™ module

3 Transport retailers can access open aggregated operator rates to achieve competitive commercial deals

6 Seamlessly handles on-demand, pre-booked, shared and multi-stop ride assignments

5 Flexible rules engine designed to support SLA's, resulting in a pro-active not re-active customer service

4 Zero capital outlay removes barriers to entry for both retailers and operators

IVCARDO

Ride tracking and full ride audit

Pre-qualified operator network

Multicurrency & multilingual

Driver facial recognition to prevent proxy driving

Find My Ride White labelled passenger app

Access to supplier rate matrices

Live flight monitoring

"Typical Transport Retailer deployment of the iVcardo Transport Services Manager module"

Pricing Model

| Transport Retailer 1 | | | | Transport Retailer 2 |

1% publishing fee

| 1% | 1% | 1% | 1% | 1% | 1% | 1% |

| RideBridge™ (referred job) | Operator (subsidiary) | Operator (referred job) | Operator (platform fleet) | Operator (platform fleet) |

2% receiving fee

| FREE | FREE | 2% | 2% | 2% |

RideBridge™ provided free of charge when using iVcardo to process rides for Transport Retailer 1 on a "First Love" basis. Avoids adoption resistance and recognises upsell opportunities.

Transport Retailer 1 can send rides to its subsidiaries free of charge forever. An operator that is a subsidiary of Transport Retailer 1 can reassign rides free of the 2% receiving fee.

When an operator begins accepting rides from another Transport Retailer, they will be required to pay the 2% receiving fee.

Transport Retailers 1 and 2 can add an operator onto the iVcardo platform enabling rides to be delivered under exisiting SLA and commercial agreements.

Transport Retailers 1 and 2 can access, and connect to, a multitude of independent operators within the iVcardo platform, agree own commercials and SLA then begins sending rides.
